Western Australia contains

Water supplied across Perth and Western Australia often contains high levels of chlorine, hard minerals, and sometimes sediment or organic matter, especially in areas using groundwater or scheme water. These elements can affect the taste, safety, and performance of your household water.

Our 3-Stage Whole House Water Filtration System is engineered to handle these conditions, giving you clean, safe water from every tap in your home.

PERTH WATER CAN BE:

- Hard (high in calcium and magnesium)
- Treated with chlorine for disinfection
- Prone to sediment in some areas

Our 3-stage system is built to target these specific issues, giving Perth homeowners a reliable solution for better water every day.

3 Stages of Powerful Protection

Stage 1: Sediment Filter

Removes dirt, rust, sand & other particles

Stage 2: Carbon Block Filter

Reduces chlorine, pesticides & organic chemicals

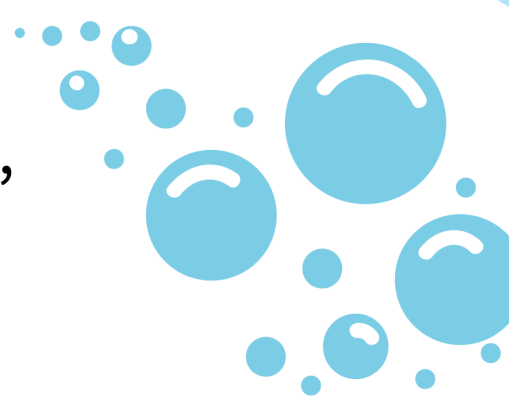

Stage 3: Advanced Carbon Filter

Eliminates bad taste, odours, and heavy metals

WaterMark Certified – Trusted Quality

Our system is WaterMark certified, fully compliant with Australian plumbing standards for quality, safety, and reliability.

Supplied & Installed – Hassle-Free Setup

We don't just sell the product — we supply and install it for you. Installation is carried out by a fully licensed plumber to ensure professional, compliant, and efficient setup.

 **Installed directly on your main water supply, this system filters all the water entering your home delivering clean water to every tap, shower, and appliance.**

KEY BENEFITS

- Filtered water throughout the entire house
- Healthier skin, hair, and appliances
- Protects plumbing & extends appliance life
- Low-maintenance, long-lasting filters
- Ideal for both town and rainwater systems

WHAT'S INCLUDED:

- Heavy-duty triple filter housing
- 3 premium filter cartridges
- Mounting bracket & connection kit
- Professional installation by licensed plumber
- Warranty & user guide

We make it simple – one call and your entire home is protected with clean, great-tasting water.

FILTERED WATER

EVERYDAY USES OF FILTERED WATER IN YOUR HOME

1 SHOWERS & BATHS

- Reduces chlorine and other chemicals that can dry out skin and hair
- Minimises irritation for sensitive skin, eczema, and allergies
- No more strong chemical smells during a hot shower

2 KITCHEN USE

- Cook with pure, clean water for better-tasting meals and drinks
- Rinse fruits and vegetables free from chlorine and sediment
- Make tea, coffee, and baby formula with confidence

4 LAUNDRY

- Softer water reduces detergent use and helps preserve clothing fabrics
- Prevents hard water stains and mineral buildup on whites and delicates

3 DRINKING WATER

- Enjoy great-tasting, odour-free water from any tap in your home
- No need for separate under-sink filters or bottled water
- Safe for kids, pets, and the whole family

5 TOILETS & BATHROOM FIXTURES

- Reduces mineral stains, discoloration, and scale buildup in toilets and sinks
- Keeps your bathroom cleaner with less maintenance

6 APPLIANCES & PLUMBING

- Extends the life of washing machines, dishwashers, hot water systems and fridge filters
- Prevents buildup of scale and rust in pipes and fittings
- Reduces costly repairs caused by poor water quality
